

Geography Intent Statement

At Gunthorpe children are encouraged to develop a greater understanding and knowledge of their local area, the wider world and their place in it. We aim to inspire children with a curiosity to discover about the world and that they are accepting of all other cultures. We want to enable children to know about the location of the world's continents, countries, cities, seas and oceans. Children will develop their skills of interpreting a range of sources. The children will understand how the human and physical features of a place shapes its location and how it can change over time. Furthermore, we want the children to be inquisitive and develop a love for learning about the world around them.
